Press Release

North Star Caviar Experiencing Market Fluctuations – Grant Funding May Not be Available for 2017.

Williston, ND, January 5, 2017: North Star Caviar is well known for its paddlefish caviar from the confluence of the Yellowstone and Missouri River, along with its generous grant funding efforts to non-profit groups improving conditions of historical, cultural, and recreational projects in the region.

Just like the commodity ups and downs of cattle and oil, caviar too, is experiencing a decrease in sales and demand. Based on recent reports from the Board of North Star Caviar, caviar sales have drastically decreased heading into the 2017 calendar year. Due to low sales, funding is currently not available for the North Star Caviar grant. Funding may come available if caviar purchases increase over the next couple of months.

If you are interested in purchasing any paddlefish caviar, you may contact Kelsey Brown for purchase orders and pricing.

###

North Star Caviar is a unique non-profit company, founded in 1993 as a joint venture of two non-profit organizations between the Williston Area Chamber of Commerce and the Friends of Fort Union/Fort Buford. The first portion of each year's proceeds from the sale of caviar is directed to the Game and Fish Department for paddlefish research, information, and enforcement. The remaining proceeds are granted back to non-profit groups in the region for historical, cultural, and recreational projects and efforts which improve conditions of habitat and land and water access for outdoor activities. www.northstarcaviar.com
